

### **Introduction**

Organisations with a positive safety culture which pervades all levels are those most likely to achieve success and excellence in all aspects of their businesses or activities. This course is designed to help clients create that culture.

### **Aim**

To provide delegates with the knowledge and skills to identify and recognise potential hazards, to recognise safe and unsafe behaviours and to use a communication and coaching technique that will promote a positive safety culture.

### **Course contents:**

- Understand the importance of a positive safety culture
- Understand the factors that influence behaviour and perception of risk
- Use conversation skills to gain understanding of workplace activities
- Apply risk assessment to identify hazardous activities and their consequences
- Influence others to eliminate unsafe practices
- Apply hazard identification and safety discussion in the workplace

**Suitable for:** HSE managers and staff, operational managers, senior supervisors

**Prior Knowledge/training:** None required

**Course Duration:** 1 day

**Numbers:** Minimum 4, maximum 12
