

### **Introduction**

The IATA Dangerous Goods Regulations set out the standards for preparation of dangerous goods for transportation by air in order for them to be accepted by an operator.

### **Aim**

To provide delegates with the knowledge required to ensure that the regulations are adhered to.  
To enable delegates to pass an examination set by the Civil Aviation Authority and receive the CAA certificate.

### **Outcomes**

Ensure that personnel responsible for air freighting dangerous goods can:

- Understand and apply the IATA Dangerous Goods Regulations
- Understand their responsibilities
- Classify dangerous goods according to the type of hazard and degree of danger
- Identify Proper Shipping Names
- Identify dangerous goods which are forbidden for air transport
- Understand and apply the information contained in the List of Dangerous Goods
- Correctly pack dangerous goods in the appropriate packaging
- Mark and label packages
- Document shipments
- Accept or reject a shipment based on the above
- Appropriately handle and stow dangerous goods

**Suitable for:** Shippers, packers, freight forwarders and cargo agents processing dangerous goods and acceptance staff responsible for dangerous goods shipments.

**Prior Knowledge/training:** None required

**Course Duration:** 3 days

**Numbers:** Minimum 4, maximum 10
